Welcome to Hemknoll

"Home of Fine Hems Since 1931"

It seems that the wild winter that we had in 1961 was shifted to other parts of the country. From reports it seems to me that the 80" and more that we had must have been equaled throughout parts of the mid-west. Ours has been a rather mild one and we are anxious to have spring arrive. Last spring after we finally lost our snows we had a very fine growing and blooming season with the finest seedlings that we have had in a number of years as it seemed that fine ones appeared in most of the color classes.

In mid-May I flew to Georgia to get a preview of the coming season and saw the Childs pinks as well as Mrs. Lester's beautiful SERENATA, which also made one of the hits of the Chicago A.H.S. Meeting. Returning home and enjoying my own season until mid-July I was then able to take in the Chicago Meeting where many fine Daylilies were seen. Without a doubt FRANCES FAY was the variety that was in every garden and at its very best everywhere. SATIN GLASS, ALAN, GREEN VALLEY, CAREY QUINN, SNAPPY RHYTHM, and ANN CLAUDETE particularly took my eye as well as several numbered seedlings. There were melon colored seedlings everywhere, as this class had only AFTERGLOW until a few years ago. Now we have no end of fine melon colored varieties. Each year one sees the wonderful advancement in Daylilies at these meetings.

There was a great deal of interest regarding the tetraploids (varieties with double chromosome count). While I can't get enthused about them the interest stirred up was enormous. Being quite new they show little improvement over what we now have and it will take time to prove their worth. Right now they are expensive and only for the serious breeder.

The greenhouse that we worked so hard and long on is now functioning and we have a nice assortment of bedding plants for customers that come here for their Daylilies and perennials. We hope that we can serve our local customers better now and wish to thank all of you who have purchased plants from us. We do appreciate your orders and hope to be able to continue serving you. (Cover—HIGH HOPES—1960 Seedling.)

CULTURE—Daylilies will grow in almost any type of soil, however it is best to avoid low wet spots. They do best planted where they will get at least 4 hours of sunlight a day. Thorough watering at blooming time will give larger and better colored flowers. When once established they need no moving for years. Complete planting instructions will accompany each order, as well as growing hints.

SHIPPING—March 15 thru May and August 15 thru November. All plants are husky, freshly dug, labeled true to name, and carefully packed. We take pride in our quality of plants and you will like our husky plants.

TERMS—Cash with order. Orders of $5.00 or over **prepaid.** Add 50 cents for packing and postage on orders for less. **If you add 50 cents for postage to any order of $5.00 or over you may select any $1.00 plant as an extra.**

PREMIUMS—Orders for $10.00 to $25.00 select 15%, over $25.00 select 25%, in EXTRA DAYLILY PLANTS. Or we will send you something extra that we hope you will enjoy. *No discounts* on collections, items marked net or Perennials.

LEGEND: E—Denotes early bloom; M—Midseason bloom; L—Late bloom. Height in inches. The letter E. or S.E. following description denotes evergreen or semi-evergreen varieties, all other dormant. Number preceeding variety indicates position in 100 Most Popular as selected by members of the American Hemerocallis Society in 1961 Popularity Poll.

WELCOME—For those of you who can, we welcome your visit during July and August—the height of our season. Here you can see over 800 varieties in bloom as well as many of our own seedlings. We are located on Reynolds Avenue in Troy Hills, about halfway between New Jersey Highway 10 and 46. Best to phone first. TUcker 7-2710.
